

Tinuvin® 5071

Power Up your formulations with our latest sustainable light stabilizer for solvent-based coatings

Application:

Tinuvin® 5071 is a sustainable light stabilizer for all solvent-based clear-coats (1K, 2K & UV). It is suitable for all substrates such as metal, plastic and wood as well as for automotive refinish, industrial, architectural and DIY coatings.

Performance Highlights:

- VOC-free UV absorber / HALS blend for SB formulations
- No severe labelling, like CMR2, H361f, H317...
- Does not react w/ acidic components
- Does not soften dry films
- Superior photo-permanence & low inherent color than Tinuvin 5151
- Shorter tack-free time in alkyd paints, therefore lower dirt pick-up

Characteristic Values:

	Tinuvin® 5071
Appearance:	Slightly yellowish liquid
Active content [%]:	100
Replacement (delivery form):	1.0 part Tinuvin 5151 with 1.0 part Tinuvin 5071
