

Lignostab™ 530: next generation of liquid light stabilizers for the protection of light-colored woods and wood veneers

Applications:

- For industrial wood coatings
- For indoor and outdoor uses
- Must be added in the water-based wood pretreatments
- Additional UV protection by means of UV absorber on the topcoat will enhance the protection

Sustainability highlights:

- Only water
- No severe labelling (EUH 208 only)

Performance highlights:

- Prevents darkening of pale wood caused by UV-light induced photo-oxidation of the lignin
- Can be used on oak solid wood and oak veneers
- Almost no own color, especially useable on very light-colored woods and wood veneers
- Liquid product form

Characteristic values:

- Appearance Clear yellowish liquid
- Active content [%] ~ 10.0
- pH ~ 5.4
