

Irgastab® Plus 5170 MG

New product form with adhesion benefits

Application:

Irgastab® Plus 5170 MG is a pressure sensitive hot melt adhesives (PS-HMA) based on styrene-block co-polymers (SBC's) like for example styrene-isoprene-styrene (SIS) and styrene-butadien-styrene (SBS), etc.

Irgastab® Plus 5170 MG is a micro granulate – a new and innovative product form for Performance Additives.

Performance Highlights:

- Tailored to adhesive applications
- Excellent color stability
- Long term adhesion protection
- Excellent retention of adhesive values
- 100% active
- High adhesion retention
- Faster processing
- Lower dust formation

Characteristic Values:

	Irgastab® Plus 5170 MG
Appearance:	White to off-white granulate
Active Content [%]:	100
Typical particle size [mm]:	0,5 – 2
Typical use levels [wt %]:	0,5 - 1
