

# Efka® FL 3750 and Efka® FL 3755

Polyacrylate-based leveling agents for solvent-based and solvent-free coatings

## Application:

Efka® FL 3750 and Efka® FL 3755 are recommended for automotive OEM and refinish coatings, other transportation coatings, wood coatings, and industrial coatings. Efka® FL 3750 is also suitable for UV curing formulations and powder coatings. They can be used in both ambient curing and baking curing systems.

## Performance Highlights:

- Improves flow behavior and promotes leveling
- Reduces orange peel and improves long wave of coatings
- Eliminates or reduces cratering
- Does not change surface tension nor influence recoatability and intercoat adhesion
- Highly compatible - does not cause turbidity nor haze in clear coatings
- Thermally stable

## Characteristic Values:

	Efka® FL 3750	Efka® FL 3755
Solid content	~100%	~52%
Solvents	No	MPA
