

# Efka® PX 4703

100% active dispersing agent with broad pigment compatibility in different UV-inks and Coating systems

## Application:

Efka® PX 4703 is a solvent-free dispersing agent, which shows excellent stabilization of a broad range of organic pigments.

A strong reduction of mill-base viscosity can be achieved in UV-ink applications.

Upside potential in high solid and 100% general industrial and automotive coatings.

## Sustainability Highlights:

- Broad suitability for organic pigments
- Food Contact Compliance: Swiss Ordinance SR 817.023.21

## Performance Highlights:

- Solvent-free product, suitable for high solid and 100% systems
- Strong reduction of mill-base viscosity
- Improved rheological behavior
- High pigment and filler loading
- Broad pigment compatibility
- Suitable for high gloss systems

## Characteristic Values:

	Efka® PX 4703
Appearance	brown, high viscous liquid
Active ingredients [%]:	~ 100
Amine value [mg KOH/g]:	~ 46
