

# Efka® SL 3230

Universal highly compatible polyethersiloxane-based slip and leveling agent significantly improving scratch resistance

## Application:

Efka® SL 3230 provides distinct reduction of coefficient of friction resulting in pronounced slip properties and improved scratch resistance. Efka® SL 3230 is very compatible in water-based, solvent-borne and solvent-free systems. Therefore, it is also recommended for high gloss clearcoats.

## Sustainability Highlights:

- Solvent-free
- Low VOC

## Performance Highlights:

- Suitable for high solid, solvent-borne and water-based systems
- Excellent reduction of coefficient of friction – high slip values and improved scratch resistance
- Low foaming
- Improved substrate wetting by lowering surface tension
- Recommended for high gloss systems due to its excellent compatibility

## Characteristic Values:

	Efka® SL 3230
Appearance:	Clear, colorless liquid
Density at 20°C [g/cm³]:	~ 1.05
Solids (1h at 120°C) [%]:	~ 98
Viscosity at 25°C [mPa·s]:	~ 1,300
