

FoamStar® SI 2281

Highly efficient universal polyether-modified silicone defoamer

Application:

FoamStar® SI 2281 is a highly efficient polyether-modified silicone defoamer for universal usage in the grinding stage, but also in the let-down with sufficient shear.

Suitable for architectural paints, General Industrial and Wood Coating applications.

Performance Highlights:

- Excellent defoaming performance
- Universal applicable
- Prevents micro- and macro-foam

Characteristic Values:

	FoamStar® SI 2281
Appearance	Colorless to slightly yellowish, clear to slightly hazy liquid
Density at 20°C [g/cm ³]	~ 1.01
Viscosity [mPa·s]	~ 500
Active content [%]	100
