

# Tinuvin® DW ECO

Highly efficient light stabilizers enabling eco-labeled paints

## Application:

- The Tinuvin® DW ECO series is our most recent generation of highly efficient light stabilizers. The new preservative chosen and tested enables the grant of the most demanding eco-labels (e.g. Nordic Swan).
- Suited for water-based coatings, adhesives and sealants, this upgraded grade combines the outstanding protection properties of the Tinuvin® DW series with today's eco-friendly needs.

## Sustainability Highlights:

- No EUH 208 label, no restriction for eco-label grant
- Enabling water-based system stabilization

## Performance Highlights:

- Patented Novel Encapsulation Additive Technology (NEAT)
- Easy adding by simple stir-in: no grinding step, no co-solvents needed
- Low viscosity
- Long-term storage stability without sedimentation or phase separation
- Eco-friendly preservative leaves coating properties unaffected

## Characteristic Values:

	<b>Tinuvin® DW ECO</b>
Appearance	White to slighty yellow liquid
Viscosity [mPa·s]:	10 – 100
Active content [%]:	20 - 45
